**Van Drew Backs Congressional Candidates Prempeh & Mayfield
In Effort to Help Republicans Take Back the House**

New Jersey's Trump-Endorsed Conservative Congressman Jeff Van Drew announced today that he is endorsing Republican congressional candidates Billy Prempeh (NJ-9) and Darius Mayfield (NJ-12) who are running Conservative grassroots campaigns to expand the 2022 Republican Congressional map in New Jersey and help Republicans take back the House by competing in traditionally blue districts.

"Billy Prempeh and Darius Mayfield are inspiring candidates taking the fight for Conservative values to mostly urban districts in North Jersey that have long suffered under failed Democrat leadership," said United States Congressman Jeff Van Drew. "Billy Prempeh is a first generation American who served our country honorably in the United States Air Force and Darius Mayfield is a successful, self made small businessman - both are incredible young men living the American dream and were motivated by their love for our country to run for Congress in order to give back to the communities that have given so much to them. I am honored to endorse these America First Conservatives and our team is committed to do everything we can to ensure their campaigns are successful in November."

Prempeh and Mayfield have also been endorsed by former Baltimore Congressional Candidate Kim Klacik as two of her Red Renaissance candidates.
